PERMIT

Place of Use

LEGAL DESCRIPTION OF AUTHORIZED PLACE OF USE

Once this system supplies 15 connections, the place of use (POU) of this water right will be the service area described in the most recent Water System Plan/Small Water System Management plan approved by the Washington State Department of Health, so long as the water system is and remains in compliance with the criteria in RCW 90.03.386(2). RCW 90.03.386 may have the effect of revising the place of use of this water right.

Proposed Works

Four existing wells

Development Schedule

BEGIN PROJECT	COMPLETE PROJECT	PUT WATER TO FULL USE
Started	January 1, 2025	January 1, 2035

Measurement of Water Use

How often must water use be measured?	Weekly
How often must water use data be reported to Ecology?	Annually (by Jan 31 for previous year)
What volume should be reported?	Total Annual Volume (ac-ft)
What rate should be reported?	Annual Peak Rate of Withdrawal (gpm)

Provisions

Ground Water Permit No. G3-30637 shall be less any water withdrawn under Ground Water Certificate No. 2716-A(C) together with Report of Examination dated February 4, 2009 including accompanying Record of Decision dated March 19, 2009, regarding annual quantity.

The total withdrawal under Ground Water Certificate No. 2716-A(C) together with Report of Examination dated February 4, 2009 (including accompanying Record of Decision dated March 19, 2009) and Ground Water Permit No. G3-30637 shall not exceed 2249 gallons per minute and 285 acre-feet per year.

Water may be used as needed for emergency fire suppression in accordance with POL-2015. Facilities may be constructed to provide rates of up to 2000 gpm, to meet fire marshal flow requirements.

Well, Well Log and Well Construction Standards

All wells constructed in the state shall meet the "Minimum Standards for the Construction and Maintenance of Wells" (WAC 173-160) and "Water Well Construction" (RCW 18.104). In general, wells shall be located at least 100 feet from sources of contamination and at least 1,000 feet of the boundary of a solid waste landfill. Any well which is unusable, abandoned, or is an environmental, safety, or public health hazard shall be decommissioned.

Required installation and maintenance of an access port as described in WAC 173-160- 291(3).

All wells shall be tagged with a Department of Ecology unique well identification number. If you have an existing well and it does not have a tag, please contact the well-drilling coordinator at the regional Department of Ecology office issuing this decision. This tag shall remain attached to the well. If you are required to submit water measuring reports, reference this tag number.

Measurements, Monitoring, Metering and Reporting

An approved measuring device shall be installed and maintained for each of the sources identified by this water right in accordance with the rule "Requirements for Measuring and Reporting Water Use", WAC 173-173.

Well water use data shall be recorded weekly and maintained by the landowner for a minimum of five years. The weekly maximum rate of withdrawal and the annual total volume shall be submitted to Ecology by January 31st of each calendar year.

Ground Water Certificate No. 2716-A(C) together with Report of Examination dated February 4, 2009 including accompanying Record of Decision dated March 19, 2009 and Ground Water Permit No. G3-30637 shall have a separate water meter from the other water rights that utilizes the authorized wells. This data shall be submitted separately from the other rights that utilize the authorized wells.

WAC 173-173 describes the requirements for data accuracy, device installation and operation, and information reporting. It also allows a water user to petition the Department of Ecology for modifications to some of the requirements.

Your recorded water-use data shall be submitted via the Internet. To set up an Internet reporting account, contact the Eastern Regional Office. If you do not have Internet access, you can submit hard copies by contacting the Eastern Regional Office for forms on which to submit the data.

Proof of Appropriation

The water right holder shall file the notice of Proof of Appropriation of water (under which the certificate of water right is issued) when the permanent distribution system has been constructed and the quantity of water required by the project has been put to full beneficial use. The certificate will reflect the extent of the project perfected within the limitations of the permit, with the exception of fire flow which does not need to be perfected provided infrastructure is in place to accomplish fire flow objectives. Elements of a proof inspection may include, as appropriate, the source(s), system instantaneous capacity, beneficial use(s), annual quantity, place of use, and satisfaction of provisions.

Municipal

If the criteria in RCW 90.03.386(2) are not met and a Water System Plan/Small Water System Management Program was approved after September 9, 2003, the place of use of this water right reverts to the service area described in that document. If the criteria in RCW 90.03.386(2) are not met and no Water System Plan/Small Water System Management Program has been approved after September 9, 2003, the place of use reverts to the last place of use described by The Department of Ecology in a water right authorization.

Prior to any new construction or alterations of a public water supply system, the State Board of Health rules require public water supply owners to obtain written approval from the Office of Drinking Water of the Washington State Department of Health. Please contact the Office of Drinking Water prior to beginning (or modifying) your project at DOH/Division of Environmental Health, 16201 E. Indiana Avenue, Suite 1500, Spokane Valley, WA 99216, (509) 329-2100.

This authorization shall not be considered a municipal supply right until the project meets the definition of a municipal supplier described in 90.03.015.

Schedule and Inspections

Department of Ecology personnel, upon presentation of proper credentials, shall have access, at reasonable times, to the project location, and to inspect, at reasonable times, records of water use, wells, diversions, measuring devices, and associated distribution systems for compliance with water law.

Water Use Efficiency

Use of water under this authorization will be contingent upon the water right holder's maintenance of efficient water delivery systems and use of up-to-date water conservation practices consistent with established regulation requirements and facility capabilities.

This permit shall be subject to cancellation should the permittee fail to comply with the above development schedule and/or to give notice to the Department of Ecology on forms provided by that Department documenting such compliance.

Dated this 5th day of September, 2013, at Spokane, Washington,

Department of Ecology

Re: Ground Water Permit No. G3-30637

Dear Mr. Byerley:

Enclosed is your permit to be retained for your records. Please read the enclosed information sheet, as well as your entire permit.

Our information indicates you have begun construction of your project. We are enclosing a *Construction Notice* form. Once you finish construction, submit the completed form to this office. **If you cannot complete your project by January 1, 2025, you must contact this office to apply for an extension.**

If you have any questions, please contact Dan Tolleson at 509-329-3526.

Sincerely,

Karen Tusa
Water Resources Program
Eastern Regional Office
